	<div style="border: 1px solid black; padding: 5px;">  <p style="text-align: center;">United States Department of Agriculture Animal and Plant Health Inspection Service</p> <p style="text-align: right;">303231 J.LORANG insp_id</p> <p style="text-align: center;">Inspection Report</p> <hr/> <p>MARTINE COLETTE Customer ID: 3621 WILDLIFE WAYSTATION Certificate: 93-C-0295 14831 LITTLE TUJUNGA CANYON ROAD Site: 001 MARTINE COLETTE</p> <p style="text-align: right;">Type: ROUTINE INSPECTION Date: Feb-22-2008</p> <hr/> <p>3.127 (d) REPEAT FACILITIES, OUTDOOR.</p> <p>***(d) Perimeter fence. On or after May 17, 2000, all outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 8 feet high for potentially dangerous animals, such as, but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.), bears, wolves, rhinoceros, and elephants, or less than 6 feet high for other animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.***</p> <p>Perimeter fence is not maintained. At the backside of Section 4, a drainage culvert is present. This culvert has a gate that can be lifted to allow for removal of debris in case of heavy rain. At the time of the inspection, the gate was fastened in the open position, creating an opening into the facility approximately 4' x 4'. There was no rain or debris present. In this same area of heavy brush, a trail was observed inside the facility heading up toward the fence line. The trail was marked by animal droppings and beaten down brush. Following the trail, a hole large enough to allow access for coyotes or bobcats was found in the fence, and the trail continued outside of the facility. A perimeter fence is necessary to ensure the safety of the animals housed, as well as to reduce disease risk from native animals. A system must be in place to ensure this fence is maintained. ORIGINAL CORRECTION DATE OF: 2-15-06</p> <p>Accompanied on inspection and by Marsha Sailer, Assistant to the Founder.</p> <hr/> <p>Prepared By: JEANNE M LORANG, A.C.I.
